Quality Water Quality Life

Quality Water Quality Life

EnviroAqua is the leading supplier of home, commercial and industrial water purification systems. Contaminated water can transmit diseases such as diarrhoea, cholera, dysentery, typhoid, and polio. Contaminated drinking water is estimated to cause 485 000 diarrhoea deaths each year. Our Reverse Osmosis System effectively removes sediments, Chlorine, calcium, magnesium and other harmful contaminants in your water.

Our mission is to give everyone the means to have access to clean drinking water and a healthy living.

Benefits of using RO System:

Saves Money

With an RO system, you can cancel your water delivery service and stop purchasing cases of bottled water. Reverse Osmosis filtration provides “better-than-bottled water” quality water for just pennies per gallon.

Improves Taste

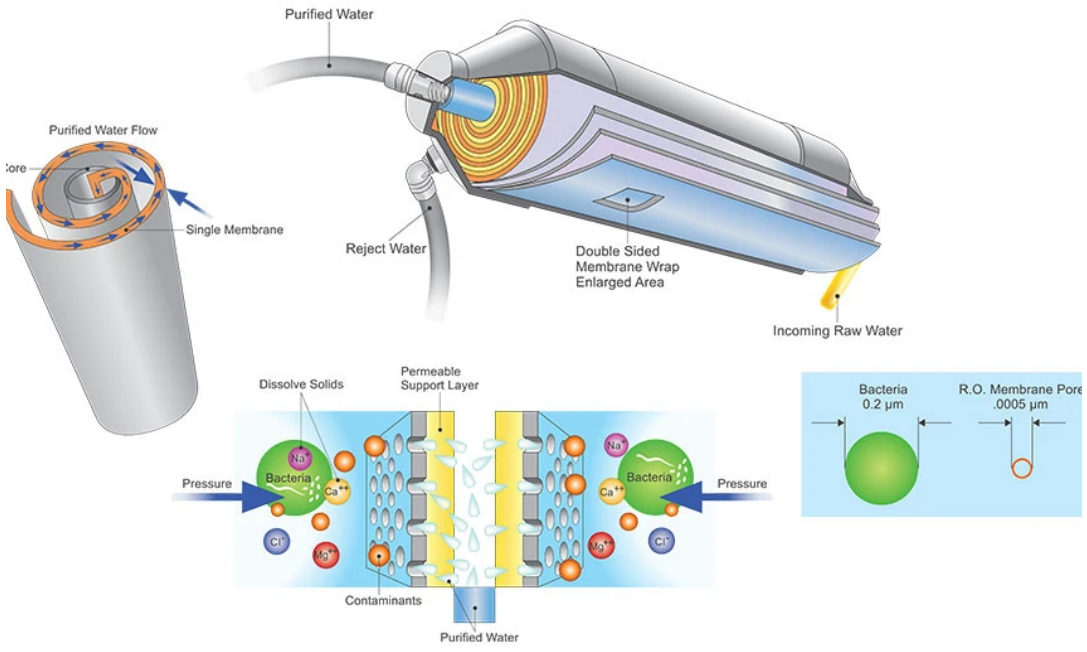

RO filtration improves taste, odour and appearance of water by removing contaminants that cause taste and odour problems

Removes Impurities

RO systems remove pollutants from water including nitrates, pesticides, sulphates, fluoride, bacteria, pharmaceuticals, arsenic and much more. An RO systems' carbon filter will also remove chlorine and chloramines.

Simple Maintenance

RO systems have very few moving or replaceable parts make RO systems easy to clean and service.

RO MEMBRANE

Our Products

Our Domestic Reverse Osmosis System

Meet our Domestic Reverse Osmosis Systems. This System converts your water into pure drinking water straight from your kitchen sink. This unit will give you between 50 gallons per day (190 litre/day) to 150 gallons per day (500 litre/day)

This unit removes the following contaminants:

- It is effective in removing dirt, rust and sand particles
- It takes out 99% of the chlorine and organic chemicals
- It remove the following hard water contaminants that may be present in your water: lead, cooper, barium, chromium, mercury, sodium, cadmium, fluoride, nitrite, nitrate, and selenium

It is the best drinking water solution for your every day need. Make a healthy choice for a quality product today.

Whole house Reverse Osmosis System

This is our light Commercial / Whole House Reverse Osmosis System that will give you 200gallons per day(750litres/day) to 800 gallons per day(3000litres/day).

This Light commercial RO system requires little maintenance, and is built using commercial grade components.

Benefits of whole house filtration;

- Safer drinking water for your family
- Healthier baths and shower
- Longer lasting plumbing and appliances
- Better for environment and wallet (no more bottled water)

It is ideal for your home , restaurant, small water purification business and small hospital.

Industrial RO Systems

Our industrial reverse osmosis systems are designed for treating low to moderate TDS feed-waters encountered in municipal supplies, dam and river waters, bore and brackish water sources. These systems are designed to be simple to install, operate and require little maintenance. Continual monitoring of feed-water pressure, RO permeate quality and storage tank level is performed by the integrated microprocessor based controller.

These units will produce between 1500 gallons per day (5600 litres/day) to 2000 gallons per day (7500 litres/day)

Our Industrial Units are ideal for the following:

Boiler feed-water treatment

Pharmaceutical

Food & beverage

Metal Finishing

Residential complex/ estate
